Heating instructions and tips for Peasant Pies

Our pies are fully cooked, then chilled. Keep your pies refrigerated before using them. Use refrigerated pies for up to 5 days or freeze them for up to 2 months.

How to heat chilled/cold pies:

- Toaster oven (**preferred)** or regular oven: Preheat oven to 400° F. Remove the pies from sleeve. Heat the pies in the oven for 8-10min on a baking tray. After removing pies from the oven, let pies sit for 2-3 minutes.

- We do not recommend microwaving the pies, but if you must: microwave 15-20 seconds on high power. Wait 2-3 minutes for heat to distribute.

How to heat frozen pies:

- Thaw the pies in the fridge overnight, then follow the instructions for heating cold pies.

Please feel free to call or email us if you have any questions.
